## Opens And Save Files Utility

Run this utility to quickly update Excel files that are currently open or saved within an Excel workbook. For each Excel file located within a directory the following actions will be performed

- Close and re-open files that are currently open and saved in the workbook
- Saved files that are closed will be re-saved automatically
- Closes a specific file once Opens and Save Files Utility is stopped or the file is manually closed.
- Represents as an "OPEN AND SAVE" menu item in Excel 2007, 2010, 2013.
- The size of an Excel file is limited to 4GB due to file size.

Installation: Open and Save Files Utility will install three files when you launch the setup executable. -

- OpenAndSaveUtilitySetup.xla -This is the main file of the utility.
- The "OPEN AND SAVE" menu item is also displayed under Tools on the Ribbon in Excel.
- If you close Excel 2007 or Excel 2010 after using Opens and Save Files Utility, then the utility will always remain installed on your computer.
- Does not work in 32 bit Excel for Windows 7.
- OpenAndSaveUtility.xla -This is required for communication with the main file and the COM add-in engine.
- You are not allowed to add, change, or remove the "OPEN AND SAVE" menu item.
- OpenAndSaveUtilityIcons.bmp -These icons are used within the utility.
- If you have more than 1 Excel workbook open, then each workbook will have it's own menu item.

Important Notes:

- Opens and Save Files Utility is an Excel Add-in file or "COM Add-in" or "add-in" file. This means the file is no longer an Excel file, but a binary COM file. You can use most text editors to open or view this file.
- In some cases, the setting of the Save As Type in the Save As dialog box will not be used when saving a file after you have opened the file using Opens and Save Files Utility.
- Use this utility program to delete the "OPEN AND SAVE" menu item for Excel 2007 and 2010.
- If you have already installed this utility, you can uninstall it using Add or Remove
